DETAILED ACTION

Specification

- 1. The abstract of the disclosure is objected to because the abstract contains more than a single paragraph. Correction is required. See MPEP § 608.01(b).
- 2. The specification is objected to because on pages 2, 14, and 16, the co-pending serial number applications are missing.

Claim Objections

3. Claims 1, 3, 4, 7, 9 are objected to because of the following informalities:

Claim 1, line 5 "said" should be deleted.

Claims 3 and 4, line 3, "the" should be changed to --a--.

Claim 7, line 2, 'the" before "outermost should be deleted.

Claim 9, line 2 "the next" should be changed to --a next--.

Appropriate correction is required.

4. The examiner respectfully suggests that the applicant reviews the remaining claims for informalities regarding the use of "the" and/or "said".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Gilbert, US patent No. 3,611,319.

Application/Control Number: 09/800,559

Art Unit: 2876

Gilbert discloses an electrical alterable read only memory comprising: an array 10 consisting of three word lines, designated W1, W2 and W3, and three bit lines, designated B1, B2 and B3, each word line is initially connected to every one of the bit lines by a data storing cell, generally designated by the letter C followed by numbers, designating the particular word and bit lines between which the cell is connected, each cell is comprised of a current-conducting element, typically a diode 12, connected in series with a fuse element 14, the fuse element 14 need not be a separate component but rather, may consist of the current-conducting link between the cell and the bit line. By supplying a sufficiently high current to any of the cells, this conducting link is affected to permanently disrupt the flow of current therethrough, and thereby inhibit subsequent flow of current through the cell which results in switching its second binary state (see figures 1-3, col. 3, line 32+).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Engeler et al, US Patent No. 3,795,847, disclose a method and apparatus for storing and transferring information. Saitoh, US Patent No. 4,382,289, discloses a semiconductor memory device. Glenn, US Patent No. 4,729,030, discloses a noise and video display apparatus. Fukushina, US Patent No. 4,922,319, discloses a semiconductor programmable memory device. Bennett et al, US patent no. 5,034,736, disclose a bistable display with permuted excitation. Rovin, US Patent No. 5,049,728, discloses an IC card system with removable IC module. Babson et al, US patent No. 5,905,670, disclose a ROM storage cell and method of fabrication. Kobayashi et al, US Patent No. 6,160,788, disclose a data recording medium, recording and reproducing system and residual amount display method. Chen et al, US Patent No. 6,178,132,

Application/Control Number: 09/800,559

Art Unit: 2876

disclose a non-volatile integrated circuit having read while write capability using one address register.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 703-305-2656. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G Lee can be reached on 703-305-3503. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7721 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
